How to Apply Envirowrapper – The Reusable Pallet Wrapper

Unfasten the storage strap

Take the end with the label and rest against the pallet

Unfold the rest of the wrapper as you walk around the pallet

As you unfold the wrapper, take the clear flap end in your left hand

At this point take both ends of the wrapper by grabbing the left and right sides at the center as shown and position the wrapper so that the bottom of the wrapper is above the top pallet board

Position the flap and hold in place using your left hand

Once the flap is in position, using your right hand apply pressure by leaning into the pallet holding the wrapper in place

Find the center strap with buckle and the center strap with J-Hook, snap the J-Hook into the back slot in the strap lock

Once the buckles are connected and snapped into place, pull the strap tight holding the wrapper in place so you can connect the remaining buckles

Pull the center strap tight

Then connect the bottom buckles and tighten the strap, then repeat the same for the top strap

Once all buckles have been secured and the straps tightened, make sure to tuck the bottom and center loose straps into the wrapper so they do not get caught in any equipment
